- Basic Knowledge in Figma and Canva
- Strong foundational knowledge in Python programming language
- Knowledgeable in HTML, CSS and JavaScript and frameworks such as React JS, Tailwind CSS and Flask for Web Development
- Machine Learning

LANGUAGES

- ENGLISH
- FILIPINO

CAREER OBJECTIVE

As a developer with a strong foundation in web development who specializes in designing user-friendly and responsive interfaces, my goal is to grow both technically and professionally through obtaining practical experience by working with experts in the field and adapting to new technologies. In addition to my skills, I obtained expertise in data science, including data preparation and development. I am also skilled in Python in which I utilize it for various applications including website, software and ML/AI systems. My goal is to make meaningful contributions to projects and establish a solid foundation for a successful career in the tech industry.

WORK EXPERIENCE

Front-end Developer Intern

2023

LexMeet I Pasig, Metro Manila
